HALF SQUARE FROM BROADWAY

COLE'S HOT BLAST

Wonderful Heater and Fuel Saver

For Soft Coal, Lignite or Hard Coal

Cost of Stove Saved in Fuel

Shows Stove Burning Soft Coal

As you know one-half of soft coal is gas—the entire gas supply for many cities and towns being made from the same kind of soft coal you are using.

The extent of unburned gases in hard coal is shown by opening the magazine cover of a base burner when the extra oxygen supplied fills the entire stove with flaming gas.

Other stoves allow this gas, which is the best part of the coal, also a large part of the heat, to pass up the chimney. This waste will average from \$10.00 to \$50.00 a year for every family and millions of dollars in fuel are thus wasted annually.

The Original Cole's Hot Blast Stove Saves All Wasted with Other Stoves

Cole's Original Hot Blast, by means of the Patented Hot Blast draft used in connection with other patented features, distills this gas from the upper surface of the coal, utilizing it as a heat producer along with the fixed carbon or coke in the coal.

On account of the patented air tight and gas tight construction giving perfect control over the drafts, it also saves the heat usually wasted up the chimney.

\$5.00 worth of hard coal, soft coal or lignite, or a \$1.50 ton of slack or coal siftings is thus made to do the work of twice the amount of fuel in other stoves and the cost of the stove is more than saved in fuel each winter. \$7.50 worth of slack will heat your house all winter, five tons at \$1.50 a ton does the work

Build only One Fire a Winter

Cole's Hot Blast is so perfect in construction that fire keeps all night, and when the draft is opened in the morning will burn two or three hours with the hard coal or soft coal put in the night before. No other stove does this. Fire, therefore, never goes out, kindling fire is dispensed with, and the rooms are kept at an even temperature all the time.

Read the Guarantee. We are the exclusive agents for Cole's Original Hot Blast and sell it on the accompanying guarantee which cannot be made on any other heating stove in the world. If you want to save half your fuel bill and would enjoy the luxury of getting up in a warm house on cold winter mornings without kindling fires, buy Cole's Original Hot Blast now.

Avoid Imitations

Imitations of this Original Hot Blast are many. None of them has the absolutely air-tight and gas-tight construction through-out which Cole's Hot Blast has by reason of its numerous patents. A Patented Steel Collar connects the elbow draft to the stove body and cannot open by action of the fiercest heat. The Patented Compound Hinge on the lower draft cannot warp, and the draft door closes air-tight by its own weight. The guaranteed Smoke-proof Feed Door prevents smoke, dust or gas escaping when fuel is put in the stove.

Imitations soon open seams and cracks which spoil them for keeping fire and cause the gas, half of the coal and much of the heat to escape up the chimney.

See the name "Cole's Hot Blast from Chicago" on the feed door of our stove. None genuine without it.

Ask to see the patented dustless ash cover for removing ashes. Our method is the only clean way.

F. N. GARDNER, JR. CO., 114-116 South Third Street.

Guarantee

We guarantee every stove to remain absolutely air-tight as long as used.

We guarantee a uniform heat day and night with soft coal, slack, siftings, or hard coal.

We guarantee that the rooms can be heated from one to two hours each morning with the soft coal, slack or hard coal put in the stove the evening before.

We guarantee Cole's Hot Blast to use less hard coal for heating a given space than any base burner made with same heating surface.

We guarantee the feed door to be smoke-proof and that the stove will hold fire with soft coal, hard coal or slack thirty-six hours without attention.

The above guarantee is made with the understanding that the stove be operated according to directions, and set up with a good fuel.

RIVER NEWS

River Stages.

Cairo	17.2	1.6	rise
Chattanooga	7.0	0.7	fall
Cincinnati	8.6	0.4	rise
Evansville	6.8	0.5	rise
Florence	6.4	0.5	fall
Johnsonville	11.1	St'd	
Louisville	3.9	0.1	rise
Mt. Carmel	1.2	0.1	rise
Nashville	12.4	St'd	
Pittsburg	6.0	St'd	
Davis Island Dam	3.0	St'd	
St. Louis	11.5	0.3	rise
Mt. Vernon	6.2	0.5	rise
Paducah	10.1	0.6	rise

The gauge registered a stage of 10.1 this morning, a rise of 0.6 in the last 24 hours. Weather threatening with intermittent rains. Rain-fall was .68 inches since yesterday.

The John A. Wood arrived from New Orleans this morning with a big tow of empties and will tie up at the island until there is sufficient water to get to Louisville. At the rate the river now is going up, that will not be long.

The Dunbar was delayed starting for Evansville from going up the Tennessee to tow the John Hopkins out of danger from the McKinnis Vencer company's fire. The Dunbar

and the Henry Harley are not making the schedule time made by the Joe Fowler and the John Hopkins. One reason is that the withdrawal of the Royal from the trade between Paducah and Golconda, throws additional business on these boats. Most of the business out of Paducah is between this city and Golconda.

Operations around the wharf are still lessened from the continued rain. Boats on the docks and ways will be delayed several days in completion.

Next week will see both the Speed and the Harvester let off the ways. The Speed probably will be completed Tuesday and the Harvester Friday. The Speed will go back to Mississippi. No new boats will be taken over till these two are let off.

Captain C. L. Smith, of Cairo, was in the city on business today. The Dick Fowler had a good trip to Cairo in the passenger business this morning. The "Happy Hooigan" company went down to the sunken city.

The Kentucky will arrive out of the Tennessee river tonight and lie over till Saturday evening.

The Saitillo did not get in from the Tennessee river until this morning on the return trip to St. Louis. The round-trip-a-week schedule for this boat has been knocked sky-high this trip.

The river is getting its share of

the country's prosperity. Despite this being the dullest season, business has held up well. This, of course, partly is due to the good water. All the boats have made more money for their owners than in any previous summer season.

Another of the Lee Line steamers, the Sun, is on her way up the river from Memphis bound for Mound City to go on the ways for repairs. The Lee Line boats are all being put in first-class condition for the fall business and will resume their trade between Memphis and Cincinnati in a little while. The Cincinnati boats will be the Peters Lee and the Georgia Lee, the former commanded by Capt. Sam Bryant and the latter by Capt. Stapleton, both well-known and popular.

One of the features of the proposed improvement of the Ohio river is the construction of a locking dam at Mound City, Ill., forty-four miles below Paducah and six miles above Cairo. This dam will create a channel with a guaranteed depth of twelve feet at low water mark, all the way from Paducah to the Mississippi river. It would also mean the uninterrupted navigation of the Ohio river for the largest boats, even under extreme low water conditions, from Cairo to the mouth of the Wabash. It would mean the continuous navigation of the Tennessee river to Waterloo and the foot of the shoals,

and the navigation of the Cumberland river as far as Dover, Tenn.

Official Forecasts.

The Ohio from Evansville to Cairo, will probably continue rising during the next several days. Present conditions indicate a stage of between 18 and 19 feet for Cairo.

The Tennessee from Florence to below Johnsonville, no decided change during the next 24 hours. The Mississippi from Chester to Cairo, will continue rising during the next 24 to 36 hours.
